Pasindu Siriwardana | Game Programmer

Hamura, Tokyo, Japan | +94 774108905 | siriwardanapasindu076@gmail.com
github.com/Gamdev708 | LinkedIn: Pasindu Siriwardana
Portfolio: portfolio.pasindusiriwardhana.workers.dev
Seeking full-time junior gameplay roles | Open to on-site, hybrid and remote work
Moved from Sri Lanka to Japan in March 2026 to study Japanese.

EDUCATION

Bachelor's degree, Computer Science & Software Engineering
University of Bedfordshire | Feb 2022 - Mar 2023 | Second Upper Division

Higher National Diploma, Computer Software Engineering
SLIIT City UNI | Feb 2020 - Dec 2021

SKILLS

Gameplay: Unreal Engine, C++, Blueprints, character movement, state machines, animation integration and gameplay debugging.
Additional: C#, .NET, Unity and Entity Framework Core.

EXPERIENCE

RAM Studios | Game Programmer Intern **Nov 2023 - Jan 2025**

- Checked festival games and fixed sequence-playback replication issues in Virtual Awurudu during a remote internship in Sri Lanka.
- Built bike and lorry subclasses for UForSafeDriveV1; manually tested and tuned their vehicle configurations.

Freelance | Game Programmer **Dec 2021 - Present**

- Develop gameplay systems using state machines and Command, Observer and Strategy patterns.

H2Compute | Full Stack Developer **Nov 2023 - Jan 2026**

- Developed C#/.NET backend systems and conducted code reviews for maintainability.

Browns Group | Associate Software Engineer **Sep 2022 - Sep 2023**

- Worked with repository patterns and Entity Framework Core.

Forloop Ltd | Associate Software Engineer (part-time) **Sep 2021 - Jul 2022**

- Investigated issues using configuration files and logs; created automated feature-testing scripts.

SELECTED PROJECTS

Feature Gym | Personal project

- Built reusable C++ combat and parkour plugins. Separated buffered presses from held-button tracking, and used animation notify windows for normal and delayed combo branches.
- Exposed attack properties, follow-up connections and charge multipliers for designers. View project source.

Aeoliada | Arcanion team project

- Contributed C++ dialogue, relationship interactions, quest state, UI controllers and gameplay fixes. Exposed Blueprint and data settings so designers could tune content.

Untitled horror game | Team game jam **Work in progress**

- Implemented interaction scanning, carrying, basic inventory operations and room-camera transitions, with Blueprint events and configurable settings. Tested in a greybox prototype.

AWARDS

Game of Codes 24-hour Game Development Competition **April 2023**

- Winner.
